

HANITH TUMMALAPALLI

Analytics Engineer — AI Data Engineer

+1 (309)-323-1406 — thanith1362@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Summary

Analytics and AI Data Engineer with 3+ years of experience building ETL/ELT pipelines, cloud data platforms, and business intelligence solutions. Skilled in SQL, Python, SSIS, dbt, Snowflake, Azure (ADF/Synapse), and Power BI. Experienced in developing AI-powered data solutions, including production RAG systems, and automating enterprise reporting. Microsoft Certified Power BI Data Analyst and Snowflake Certified.

Technical Skills

Programming & Analysis: Python, R, SQL (Joins, CTEs, Window Functions), Data Modeling, Statistical Analysis

Data Engineering / ETL: SSIS, ADF, DBT, Alteryx, Spark, Airflow

Databases: SQL Server, MySQL, PostgreSQL, Snowflake, Big Query, Azure Synapse, NoSQL

Visualization: Power BI (DAX, Measures), Tableau, Superset, Advance Excel, Qlik

Cloud & Platforms: AWS, Azure, GCP, Docker, Kubernetes, Git

AI & Analytics: NLP, Machine Learning, Statistical Analysis

Experience

Advanced Medical Transport – Data Science Intern, Illinois, USA **May 2026 – Present**

- Designed, developed, and deployed an on-premises Retrieval-Augmented Generation (RAG) system using Ollama and Gemma LLM for secure, AI-powered semantic search across internal documentation, reducing document lookup time by 60%.
- Designed and built SQL Server ETL pipelines with SSIS to integrate CAD, billing, and operational healthcare data, cutting manual processing by 40% and improving reporting accuracy.
- Automated HIPAA-compliant exception reporting and data validation workflows, saving 8+ hours per week and strengthening compliance and data integrity.

Praval Infotech Pvt Ltd – Data Engineer / ETL Developer, Hyderabad, India **Nov 2023 – Jan 2025**

Client: Digital Realty — Domain: Data Center & Cloud Infrastructure Analytics

- Built and maintained SSIS packages using SQL for automated data loading into database servers, improving ETL reliability and reducing job failures by 40%.
- Integrated Power BI with SQL Server Management Studio (SSMS) and Microsoft Fabric to create scalable reporting solutions for operational and executive use.
- Designed and optimized SQL queries to improve data refresh speed and dashboard load times by 30%, enhancing end-user experience and decision-making efficiency.
- Delivered multiple analytics projects and dashboards by gathering requirements, documenting processes, and defining KPIs with stakeholders for supply chain and operational insights.

Bradley University – Research Assistant, Illinois, USA

Aug 2025 – May 2026

- Built end-to-end machine learning pipelines on 230,000+ patient records (in collaboration with OSF HealthCare) to predict heart disease and diabetes, improving prediction accuracy by 8%.
- Engineered data preprocessing, cleaning, and feature-engineering workflows in Python and SQL to deliver analytics-ready datasets for modeling and reporting.
- Evaluated and tuned models using AUC, precision, recall, and F1, and automated reproducible training and validation for efficient experimentation.

Vertocity – Data Analyst, Hyderabad, India

Jul 2022 – Oct 2023

- Analysed academic and operational datasets to identify trends and improve reporting efficiency.
- Developed a Django-based ERP system to centralize progress tracking and staff activity.
- Created Excel dashboards with Power Query and Power Pivot, reducing reporting time by 30%.
- Implemented data-driven decision-making for student performance analysis.

Projects

Healthcare Data Pipeline – Clinical/Healthcare Analytics (Azure ADF, Synapse, Power BI)

- Built ADF pipelines to extract patient and clinical data from on-prem SQL Server into Azure Synapse.
- Applied governance and compliance checks to ensure data quality for reporting and analysis.
- Developed Power BI dashboards for clinical insights, supporting data-driven healthcare decision-making.

DataMate – AI-Powered Data Tool (Python, Django, SQL)

- Built an AI-driven query engine translating natural language into SQL queries, reducing query turnaround by 70%.
- Integrated with multiple databases through a Django backend for scalable execution.

Sales & Profit Analytics Dashboard (SQL, Power BI)

- Designed Power BI reports analyzing sales, profit, and unit distribution across countries and years.
- Created custom DAX measures supporting financial planning and trend analysis.

Financial Data Warehouse & Analytics (DBT, Snowflake, Power BI)

- Built DBT pipelines to transform and load financial datasets into Snowflake.
- Designed star schema tables and created Power BI dashboards with drill-throughs.

Education

Bradley University, Illinois, USA

Jan 2025 – (Expected Dec 2026)

Master of Science in Data Science (GPA: 4.0)

Developing advanced skills in statistical analysis, SQL, Python, Power BI, Tableau, Big Data, Azure Data Factory.

Certifications

Microsoft Certified: Power BI Data Analyst Associate — [Certificate Link](#) — Snowflake Certified — [Certificate Link](#)
