

# HANITH TUMMALAPALLI

Data Analyst — Data Engineer

+1 (309)-323-1406 — [thanith1362@gmail.com](mailto:thanith1362@gmail.com) — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

## Summary

Microsoft Certified Power BI Data Analyst Associate with experience in data analysis, data modeling, ETL pipelines, and cloud analytics across enterprise and financial domains. Skilled in SQL, Python, Power BI, SSIS, and Azure(ADF), with a proven ability to build dashboards, automate reporting workflows, ensure data quality, optimize performance, and deliver actionable business insights. Currently pursuing a Master's in Data Science at Bradley University.

## Education

**Bradley University**, Illinois, USA Jan 2025 – (Expected Dec 2026)

Master of Science in Data Science (GPA: 4.0)

Developing advanced skills in statistical analysis, SQL, Python, Power BI, Tableau, Big Data, Azure Data Factory.

## Experience

**Praval Infotech Pvt Ltd – Data Analyst**, Hyderabad, India Jan 2024 – Jan 2025

Client: Digital Realty — Domain: Data Center & Cloud Infrastructure Analytics

- Built and maintained SSIS packages using SQL for automated data loading into database servers, improving ETL reliability and reducing job failures by 40%.
- Integrated Power BI with SQL Server Management Studio (SSMS) and Microsoft Fabric to create scalable reporting solutions for operational and executive use.
- Designed and optimized SQL queries to improve data refresh speed and dashboard load times by 30%, enhancing end-user experience and decision-making efficiency.
- Delivered multiple analytics projects and dashboards by gathering requirements, documenting processes, and defining KPIs with stakeholders for supply chain and operational insights.

**Vertocity – Data Analyst**, Hyderabad, India Jul 2022 – Oct 2023

- Analysed academic and operational datasets to identify trends and improve reporting efficiency.
- Developed a Django-based ERP system to centralize progress tracking and staff activity.
- Created Excel dashboards with Power Query and Power Pivot, reducing reporting time by 30%.
- Implemented data-driven decision-making for student performance analysis.

**Bradley University – Research Assistant**, Illinois, USA Aug 2025 – Present

- Developing ML models to predict heart disease using patient datasets (230,000 records), improving prediction accuracy by 8%.
- Applying preprocessing, feature engineering, and statistical modelling to optimize performance metrics (AUC, Precision-Recall).
- Evaluating algorithms and implementing improvements for efficient model training and testing.

## Projects

**Healthcare Data Pipeline – Clinical/Healthcare Analytics (Azure ADF, Synapse, Power BI)**

- Built ADF pipelines to extract patient and clinical data from on-prem SQL Server into Azure Synapse.
- Applied governance and compliance checks to ensure data quality for reporting and analysis.
- Developed Power BI dashboards for clinical insights, supporting data-driven healthcare decision-making.

**DataMate – AI-Powered Data Tool (Python, Django, SQL)**

- Built an AI-driven query engine translating natural language into SQL queries, reducing query turnaround by 70%.
- Integrated with multiple databases through a Django backend for scalable execution.

**Sales & Profit Analytics Dashboard (SQL, Power BI)**

- Designed Power BI reports analyzing sales, profit, and unit distribution across countries and years.
- Created custom DAX measures supporting financial planning and trend analysis.

**Financial Data Warehouse & Analytics (DBT, Snowflake, Power BI)**

- Built DBT pipelines to transform and load financial datasets into Snowflake.
- Designed star schema tables and created Power BI dashboards with drill-throughs.

## Technical Skills

**Programming & Analysis:** Python, R, SQL (Joins, CTEs, Window Functions), Data Modeling, Statistical Analysis

**Data Engineering / ETL:** SSIS, ADF, DBT, Alteryx, Spark, Airflow

**Databases:** SQL Server, MySQL, PostgreSQL, Snowflake, Big Query, Azure Synapse, NoSQL

**Visualization:** Power BI (DAX, Measures), Tableau, Superset, Advance Excel, Qlik

**Cloud & Platforms:** AWS, Azure, GCP, Docker, Kubernetes, Git

**AI & Analytics:** NLP, Machine Learning, Statistical Analysis

## Certifications

Microsoft Certified: Power BI Data Analyst Associate
